Dear Editor,

Please find enclosed the manuscript being submitted to **Arquivos Brasileiros de Endocrinologia & Metabologia**, entitled " **An International Survey of Screening and Management of Hypothyroidism during Pregnancy in Latin America** ", by Mateus Fernandes da Silva Medeiros, Joaquim Custódio Junior, Taise lima de Oliveira Cerqueira, Magali Teresopolis Reis Amaral, Bijay Vaidya, Kris Poppe, Gisah Amaral de Carvalho, Silvia Gutiérrez, Graciela Alcaraz, Marcos Abalovich and Helton Estrela Ramos, for the Latin American Thyroid Society .

We have made changes to our manuscript according to the comments by the reviewer. We hope the manuscript is now suitable for publication in **Arquivos Brasileiros de Endocrinologia & Metabologia** and we look forward to hearing from you in this regard.

Sincerely,

Helton E Ramos, M.D., PhD

We could not find any statistic significant difference between the answers coming from different countries in Latin America. All the analysis were performed, mainly involving responders from Brazil, Argentina, Colombia, Peru and Mexico. This information was added in the text (Page 10, Line 9–10).
